MARRIED ONE OF MYSTERY SISTERS

Four Sisters Worth a Hundred Mil-
lion, and One of them Married to
Littlestown Man. Have no Interest
in New Inventions.

Born New Yorkers, their lives sur-
rounded in mystery for nearly half a
century, there are four sisters, the
Wendels, having one hundred million
dollars in gilt-edged realty, living on
Fifth Avenue, New York City, whose
customs and manner of living are the
same as those of a generation ago.
But one of the sisters, Mrs. Rebecca
A. D. (Wendel) Swope, is married,
living in Central Park, New York.
Her husband, Luther A. Swope, is a
native of Littlestown.

Only recently John Gottlieb Wendel,
who died at Santa Monica, Cal., last
November 30, added nearly \$40,000,
000 to the then \$60,000,000 fortune of
the four sisters.

The marriage of the second sister,
was shrouded in just the same mys-
tery that the lives of the four have
been for the past half century. For
twenty-five years Luther A. Swope
was the devoted admirer of this wom-
an. He was one of a glaringly small
percentage that was admitted to the
impressive home of the style of a cen-
tury ago on Fifth Avenue. The sisters
are "not at home" to any but a very
few friends.

It was June 30, 1903, that the sec-
ond sister and Swope were married in
New York. Since that time they have
been living at 249 Central Park West,
New York. Not since his marriage has
the husband of one of the four
richest sisters in the world, deigned
to call on his Littlestown friends.

It is reported that Swope is the
custodian of a large part of the one
hundred million dollar estate of the
mysterious sisters. He is at least in
charge of the tremendous fortune of
one of the sisters, his wife.

The four sisters and their ages are:
Mary E. Wendel, 73; Georgianna G. R.
Wendel, 65; Mrs. Rebecca A. D. Wen-
del, 71; Ella V. on E. Wendel, 50.

The estate may total as much as
\$100,000,000 in the choicest New York
realty. The fees alone for appraising
it will figure more than \$70,000, a
fortune in itself. It pays a tax of
more than a million to the city annu-
ally. The inheritance tax may foot up
\$2,000,000. And it may be that clever
eyes will ferret out sundry parcels
transferred by the old gentleman,
John Wendel, the sisters' brother, be-
fore his death, so as to dodge imposts
of the kind.

These four sisters of mystery own
117 parcels of New York city land,
any one of which would be an inheri-
tance worth while. The old family
home is on Fifth Avenue, with its ad-
joining yard, fronting on the thorough-
fare, assessed at \$1,902,000 and
worth nearly twice that. The yard
itself is worth quite \$500,000.
"John kept that for me, so that Trixy,
my dog, could run there," explains
Miss Ella Wendel.

The Wendels never sold and never
improved. And the Wendels never
yielded up an inch except when they
had to, condemned by the city for the
margin of improvement.

The four sisters have been enor-
mously wealthy from birth.

They have never ridden in an auto.
They have never been on a yacht.
They have never attended a theatre.
They have not been in a church for
20 years.

They never wear any article of
jewelry.

They have never used a telephone.
They have never used an elevator.
They never gave a social entertain-
ment or received callers.

WILL START WORK ON BATTLEFIELD

Twenty Six Men will Begin Spring
and Summer Repair and Renova-
tion Work on the Avenues. Pro-
gram of their Operations.

Next Monday morning—March
first—the full force of men will be
put to work on the battlefield and
twenty six hands will be employed
from that on until the late fall.

A large amount of work is await-
ing the opening of operations. Many
of the gutters at the sides of the av-
enues have been washed out and will
have to be repaired. Numerous loose
stones are on the avenues and will be
picked off. The two large steam roll-
ers will at once be put to work and
the roadways put in the very best of
condition for the early spring tourists
and other visitors. The sod has under-
gone the usual effects of freezing and
thawing and will be given its annual
pounding down.

This work is expected to require
about two weeks and the two dozen
men will next be put on the rebuild-
ing of stone walls and breastworks
over the field. Many of the stones
have become dislodged and the walls
in many places present a rather rag-
ged appearance. The cleaning out of
the underbrush is no small task and
some new gutters will have to be laid.
By the time all this is finished, it is
expected that the grass will be ready
for the mowing and the regular sum-
mer routine will be in order.

This year all of the iron work on
the field will be repainted. Cannon,
cannon balls, the iron signs at the
sides of the avenues and other work
will all be gone over. This is done
every two years. The fences were re-
painted last year. The observatories
are painted every four years and this
summer will not require any attention
of this sort.

All of the bronze tablets on the
field will undergo their annual polish-
ing, a task that requires many days
in itself.

THEIR LOSSES TO BE PAID AT ONCE

Checks for Cattle Killed on Four-
teen Adams County Farms will be
Mailed to Stock Owners within
the Next Two Days.

Fourteen farmers in the southern
and eastern townships of Adams
County, who lost cattle as a result of
the hoof and mouth disease, and who
have been forced to wait several
weeks for the money paid by the
State for such losses, will receive the
money due them within the next
forty-eight hours it is predicted. Gov-
ernor Brumbaugh on Thursday signed
the bill appropriating \$500,000 to pay
bills now in the hands of the State
Live Stock Sanitary Board, amount-
ing to \$526,000.

The board has the checks made out,
and as soon as the funds are deposited
in the bank for payment, the checks
will be mailed. The Legislature took
action on the bill soon after conven-
ing, and finally passed the measure
before adjourning last week.

Representatives of beef packers
and butchers are complaining against
the ruling of the board preventing
them from receiving compensation for
diseased cattle found in the slaughter-
pens. They contend that they should
receive as much consideration for
their losses as the farmer. The rule
was passed to discourage butchers
and packers from taking chances on
bringing diseased or suspected cattle
to the abattoir.

A tightening of the quarantine, on
account of the hoof and mouth disease
being found on the Mrs. Silas Forry
farm, West Manchester township,
about one mile from the York city
line, will prevent shipments of cattle
to and from York, for 15 days, as it
is within the three mile limit.

The counties of Franklin, Perry and
Mifflin have been relieved from quar-
antine.

It is estimated that 20,000 animals
of various kinds were destroyed in
fighting the disease, making it the
most expensive outbreak ever known
in the cattle industry in Pennsylvania.
Approximately \$26,000 above the half
million appropriated is claimed in
vouchers filed with the board and
these and other expenses which may
be incurred before the close of the
session will probably be cared for.
The national Government already has
provided its half of the expense. The
cattle will be paid for as appraised
under the provisions of the act of
1913.

DOG QUARANTINE

State and Town Council Have Atten-
tion Called to Rabies Outbreak.

Dr. M. Moriarty is advised by
State Veterinarian Marshall that the
matter of placing a general dog quar-
antine on Gettysburg on account of
the recent outbreak of rabies here,
will be taken up at the next meeting
of the State Livestock Sanitary
Board which will be held in the near
future. Dr. Moriarty will also call
attention of the town council to con-
ditions at their meeting next Tues-
day evening.

Basket Ball Team Got away with Sus-
quehanna.

Susquehanna proved no match for
Gettysburg's quintet after they got
going in the local gymnasium Thurs-
day evening and the locals galloped
away to the tune of 49 to 26. The
visitors were aggressive at the start
and tied the score at 14 points but
Gettysburg took on speed and scored
ten more points before the end of the
half. Williams starred, getting eight
field goals. Susquehanna made only
five baskets from play.

TOWN AFFLICTED WITH LA GRIPPE

Whole Families Succumb to Disease
which Visits York Springs. Fifty
Cases in the Village. Apparently
very Contagious.

York Springs is emerging from one
of the most general epidemics the
town has had for many years. No less
than fifty citizens of that borough
have been ill with a severe form of La
Grippe which is of an infectious
character and has spread with re-
markable virulence over the town.

In some homes every member of
the family has been sick at one time,
in others only one member escaped the
contagion, while in almost every re-
sidence of the borough at least one
person complained of the tell-tale
symptoms. The physicians were very
busy coping with the condition and
there seemed to be no way to stop the
spread of the sickness until it had lit-
erally spent itself and taken all avail-
able victims.

The sickness, while not of a serious
character, has done much to cause
discomfort and suffering among the
residents of the town. Those who fell
before it have been confined to their
homes for days at a time and activi-
ties were at a standstill. The public
schools were but little interfered
with, the disease attacking principally
the older members of the family,
though last week the High School suf-
fered some inconvenience.

There are still a number of persons
sick in the town but it is believed
that, with favorable weather condi-
tions, there will be little further in-
fection. Weather, state the knowing
ones, is always largely responsible
for a Grippe epidemic.

DIRECTORS MET

Hanover May Join the New Base Ball
League.

More details in connection with the
Blue Ridge League—the official name
of the base ball organization of which
Gettysburg will form a part—were
decided at a meeting of the directors
on Thursday at Hagerstown. The as-
sociation will go under national pro-
tection at a cost of \$15 to each team;
gate receipts will be divided equally
except on opening days and holidays
when the receipts will go into the
league treasury; and a salary limit of
\$800 a month for each club was deter-
mined upon.

Hagerstown objects to the gate re-
ceipts division, feeling that her at-
tendance will be considerably larger
than in the other league towns.
Brunswick asks admittance into the
league, but the request will be held
under advisement pending investiga-
tion as to the possibility of Hanover
wishing to join.

The season will open May 27 and
close September 1, and J. A. Holtz-
worth of this place is on the commit-
tee to arrange the schedule.

Hudson Light Six the Pattern The Most Widely-Copied Car Ever Built.

Every "light six" on the market shows the impress of the Hudson. The Hudson Light Six-40 is the pattern car of its type. It has been more widely copied than any car ever built. Even the form of its name has set the fashion for imitators. But as no copy ever equals the original so the Hudson Light Six-40 never has been approached by rivals. More of them are in service than all other light sixes combined. It is known the world around. Motorists invariably consider it the standard of comparison. The genuine sometimes costs more than a copy. But it is worth the difference.

The Hudson sets the standard. You must see it before you decide. Come, let us show you the car and take you for a drive. You be the judge.

BRITAIN SUPPORTS CZAR'S AMBITION

Agrees to Let Russia Seize Constantinople.

A COMMERCIAL NECESSITY

Pledge Means Great Prize For Muscovites If Allies Win the War—Fleets Again Batter Dardanelles Forts.

London, Feb. 26.—Sir Edward Grey, the foreign secretary, announced in the house of commons that Great Britain was in entire accord with Russia's desire for access to the Mediterranean sea.

"With Russia's desire for access to the sea, England is in entire accord," the foreign secretary said, in response to a question from Frederick W. Jowett, whether England knew of and approved the statement of the Russian foreign minister, M. Sazonoff, in the duma, that "Russia intended permanently to occupy Constantinople."

The foreign secretary replied that he was unaware that M. Sazonoff had made any such statement, but, he added, "the statement I have seen was that M. Sazonoff had said that the events on the Russo-Turkish frontier would bring Russia nearer realization of the political-economic problem bound up with Russia's access to the sea."

"With these aspirations," he continued, "England is in sympathy. What form their realization will take will no doubt be settled by the terms of peace."

The announcement of Sir Edward Grey marks one of the important developments in the European political situation, since the beginning of the war Russia's desire for a warm water port and unrestricted outlet from the Black sea has been one of her most cherished national aspirations.

Speaking in the duma, Feb. 9, Premier Goremykin said:

"For more than a century Russia has cast longing eyes upon Constantinople, the possession of which would release her fleets from the Black sea and give her a port open to the Mediterranean and thence to the world, for vast as Russia is, she is woefully lacking in warm water ports, so necessary to the development of commerce."

Again Shell Dardanelles. Salonika, Feb. 26.—The Anglo-French fleet is again bombarding the Turkish forts on the Dardanelles.

All the forts at the entrance to the Dardanelles have been reduced by the allied fleet. This announcement was made officially in London.

The bombardment has been proceeding for several days, and after the first day's attack it was announced that the allied fleet had thrown 2000 shells at the forts, doing serious damage.

It is said that the Turkish crown jewels have been removed from Constantinople into the interior of Asia Minor.

SERB SHELL KILLS OFFICERS

Thirty Austrian Army Chiefs Die When Building Is Struck.

London, Feb. 26.—A Salonika dispatch to the Daily Chronicle says:

"According to a Serbian official statement thirty Austrians—staff officers—were killed by the Serbian bombardment of Semlin last week."

"They were gathered in a council of war, when a shell struck the building. The next day the Austrians sent a flag of truce with the request that the Serbians cease the bombardment of Semlin and in return they promised to cease the bombardment of Belgrade."

BIG STRIKE IN ITALY

National Walkout Is Feared and the Troops Are Called Out.

Rome, Feb. 26.—A national strike is threatened in Italy. Owing to the economic crisis brought about by the war and the higher cost of bread, a general strike was declared at Naples on Wednesday.

The Socialists and the leaders of the trades unions are co-operating in the movement. About 8000 men are idle in Naples.

To Eat Captured Potatoes.

Berlin, Feb. 26.—The Prussian minister of agriculture, Baron von Schorlemer, discussing the food question in the diet, said that quantities of potatoes would be brought in from Poland, and that large supplies were left in East Prussia, where the Russians had been. "I believe I can express the hope," he added, "that the potato supply and food will suffice."

Germany Has 9,998,000 Troops.

London, Feb. 26.—Germany's total army of trained and untrained men consists of 9,998,000 soldiers, according to an announcement by Under Secretary of State for War Tennant in parliament.

U. S. Physician Dies in Serbia.

Paris, Feb. 26.—Dr. James F. Donnelly, of the American Red Cross Mission, sent to Serbia, died at Nish, says a dispatch to the Havas agency from Salonika. The body will be sent to the United States by way of Salonika.

LINDLEY M. GARRISON.

Forbids Army Men to Discuss Military Affairs.

by American Press Association.

Secretary of War Garrison issued the following general order: "The secretary of war is convinced that the best interests of the service are promoted by the appearance in public prints of interviews, statements, discussions or articles by officers of the army on the military situation here or abroad, and he therefore directs that all officers refrain therefrom until further orders in the premises." This order followed an announcement by the secretary that Captain William Mitchell, of the general staff, had been exonerated of the charge of talking too freely in public on the subject of the European war and the relations to it of the United States.

30 GERMANS KILLED BY AIRMAN'S BOMBS

British Aviator Bombs Town of Knocke, Belgium.

London, Feb. 26.—The British and French airmen are taking an active part in the fighting in the western theater. A dispatch from Amsterdam says:

"Thirty German soldiers are reported to have been killed and forty more wounded in the bombardment of Knocke, Belgium, by a British aviator."

"According to information from Zeerbrugge the aviator dropped many bombs on Knocke, some of which wrecked the tramway line. The aviator escaped, although fired on many times."

"French aviators aided in an attack on the Germans in the Champagne region, where the fighting has been violent for several days. The flyers hurled bombs on the enemy's positions, railway stations and trains."

An official note was issued by the French war office warning newspapers against publishing photographs which might be made use of by the Germans. It points out that a Paris paper recently printed a picture of a priest saying mass among the troops. It says that the Germans concluded that the French were in force in that village and shelled it, killing fourteen troops."

SEEK FORTUNE ON FARM

Relatives of Dead Couple Find \$1000 Hidden Away on Premises.

Beverly, N. J., Feb. 26.—Discovery of gold coins and banknotes hidden in old crockery, books and tin cans about the house prior to the double funeral of Edward Kimble, eighty-two years old, a farmer, and his aged wife, who died a few hours apart, has convinced relatives of the aged pair that their homestead at Cooperstown, near here, conceals a hidden fortune. One thousand dollars already has been recovered.

A thorough search of the farmhouse, from attic to cellar, was commenced, and the quest will be continued in the barn and outbuildings. Neighbors who remember seeing Kimble digging in his garden late in the evenings on several occasions, have suggested that this acre be spaded up in a search for buried gold.

Swap Disabled Prisoners.

Berne, Feb. 26.—France and Germany have concluded arrangements for the exchange of prisoners of war totally incapacitated for any future military activity, and in a few days the repatriation of these men will begin. Swiss hospital trains will be made use of for the transportation of invalids.

Whipped, He Kills Father.

Mobile, Ala., Feb. 26.—The mystery of the murder of W. M. Gray at Shubuta, Miss., last Sunday, was cleared up by the confession of the victim's twelve-year-old son, Raymond. The lad told the officers that he killed his father with a shotgun because of a whipping he had received.

English Flyer Killed in Flight.

London, Feb. 26.—Flight Lieutenant Dawson C. Downing, of the Royal Navy Flying Corps, was killed in a fall from a biplane during a flight at the central flying school.

GERMANS TAKE PRZASNYSZ

Fortified Town Barring Poland Advance Stormed.

PETROGRAD DENIES CLAIM

Russian Capital Declares Russian Army Has Checked Foe's Offensive on Eastern Front.

Berlin, Feb. 26.—The town of Przasnysz, in Russian Poland, was taken by storm by the German forces, according to the official announcement given out in Berlin.

"In the eastern arena the engagements on the Memel, Bobr and Narwa rivers continue."

"The town of Przasnysz, which had been extensively fortified, was stormed by the East Prussian reserves. After a stubborn fight we were victorious, capturing more than 10,000 prisoners, twenty cannon, a large number of machine guns and a large amount of war material."

"In other engagements fought north of the river Vistula during the last few days we have taken 5000 Russian prisoners."

"In Poland, south of the Vistula, the Russians advanced to Mogily, which is southeast of Bialow, and occupied this position. Their forces in this movement outnumbered our five to one. Otherwise there is nothing of importance to report in this region."

"It is characteristic that the commander of the Fifty-seventh Russian reserve division, taken prisoner at Augustowo, asked German officers whether it was true that Antwerp was being besieged by the Germans and soon would fall. When the situation on the western front was explained to this Russian officer he refused to believe that the German western army was on French soil."

Petrograd Discredits German Claim.

Petrograd, Feb. 26.—The Germans appear to have concentrated large forces near Przasnysz, which is now the center of their attack in the region of the Vistula. The action about Ossowetz, which had been the chief point of attack by the Germans, is becoming less intense.

Serious fighting is reported also further to the north, at Stablin and Yastrzemb, points between Grodno and Augustowo, but there is little information concerning the character of these actions.

According to official comment, the Germans have exaggerated the magnitude of their victories along the East Prussian front, and from the Russian viewpoint the fighting in northern Poland "is only now beginning." The German claim that they have brought to a brilliant finish their winter campaign is characterized in Petrograd as premature.

A Russian officer expressed the view that the German claims were made in the hope of offsetting what he termed the loss of sympathy of neutral powers.

The German detachment which crossed the river Niemen at three points on Feb. 23 has been scattered by Russian cavalry, and part of this force has been captured. Some of the prisoners had in their possession explosives and tools which indicated that they were intending to blow up the railroad leading from Vilna to Warsaw.

In Galicia the Austro-German forces have occupied a new front extending from the Carpathians to Stanislaw. The characteristic feature of this front is its thinness. The rear of the Austro-German lines touches Rumania. The line of communication is maintained from the flanks, being parallel with the Carpathians.

Russians Again Invade Bukovina.

London, Feb. 26.—Russian troops have reinvaded Bukovina and recaptured Sadagora, on the railroad four miles north of Czernowitz, according to a dispatch received by the Evening News from Mamornita, in Rumania. The Austrians, the correspondent adds, are pushing up their troops towards Czernowitz, to meet this new Russian attack.

Send Submarines to Adriatic.

Geneva, Feb. 26.—Three new German submarines arrived by railroad at Pola, the chief naval station of Austria-Hungary, according to a telegram to the Tribune, and will soon begin operations in the Adriatic and the Mediterranean. A dispatch from Munich says Germany is arranging to send several other submarines to Austria.

Germans Seize Business Enterprises.

Berne, Switzerland, Feb. 26.—A Wolf agency dispatch from Brussels says that the German governor general von Biesing, has authorized the sequestration of all business enterprises in Belgium owned by subjects or citizens of nations with which Germany is at war.

EXTRA SESSION FOR SENATE

President Wants Action on Treaties and Trade Commissions.

Washington, Feb. 26.—Possibilities of an extra session of the senate alone after March 4 for consideration of treaties and nominations were being discussed among administration leaders here.

While White House officials refused to discuss the subject, it was known that President Wilson is giving it consideration. A decision on the subject will probably be reached at the cabinet meeting.

Treaties with Columbia to pay \$25,000,000 for the partition of Panama and with Nicaragua to pay \$3,000,000 for inter-oceanic canal rights and for naval bases, undoubtedly will fall of ratification at the present session. The need of action upon them is considered by the administration as of great importance. Officials also fear confirmation of the federal trade commission will be delayed.

The president, it was said, has no thought of an extra session of congress as a whole.

SENATE VOTES FREE SEEDS

Rejects Action of Committee in Striking Out \$400,000 Item.

Washington, Feb. 26.—By a vote of 21 to 36 the senate rejected the action of its committee on agriculture in striking out of the agricultural appropriation bill an item of \$400,000 for free seeds.

The saving of the free seed distribution expense item by the senate was accompanied by several speeches defending the usefulness of the custom, and the quality of the seeds.

JAPANESE DEMANDS ON CHINA MODIFIED

Conferees Make Progress Toward Compromise.

Peking, Feb. 26.—The outlook for an adjustment of the differences which have arisen between China and Japan has improved distinctly.

The conferees between the representatives of the two nations apparently are progressing toward a compromise.

The most important step yet taken in this direction was disclosed in Peking. The Japanese government has given indications, regarded as definite, that it will not insist for the present upon the group of general demands which it presented. These include the chief points upon which China based her resistance to the representations from Tokyo.

The principal demands which Japan is reported thus to have waived for the present are outlined as follows:

The Chinese government shall consult Japan before choosing foreign advisers in political, military and in financial matters, and if such advisers are employed, Japanese shall be preferred.

China and Japan shall police jointly important places in China, or Japanese shall be preferred in case foreign police advisers are employed.

China shall purchase from Japan at least one-half of the arms and ammunition it uses hereafter, otherwise an arsenal shall be established in China employing Japanese experts and materials.

Japan shall have special privileges in the province of Fukien and shall be consulted first in case foreign capital is required in the province for railroad construction, shipbuilding, mining and harbor improvements.

Japan shall have the same rights as other nations to establish missions, schools and churches throughout the country, with the privilege of propagating Buddhism.

Japan shall enjoy certain enumerated rights in connection with the construction of railroads.

KILLED ON RAILROAD

Well Known Hanover Brakeman Meets Sudden Death.

When he fell between two cars near Fulton, William H. Leppo, a Western Maryland freight brakeman, well known here, was instantly killed Thursday night. Mr. Leppo was on the regular run between this place and Baltimore when the accident occurred. He was 30 years old, a resident of Hanover, and has a wife and several children.

"BOY PLUNGER" NOW BANKRUPT

Jesse Livermore Loses Fortune Made by Speculation.

OWES MORE THAN \$100,000

Bought Mansion, Yacht and String of Automobiles After Stock Market Panic of 1907—Reported to Have Lost \$3,000,000 When He Tried to Corner Cotton in 1908.

Jesse L. Livermore, the "boy plunger," who "ran a shoestring into a fortune" by Wall street manipulation, has filed a voluntary petition in bankruptcy. He gives his liabilities as \$1,024,741 and places no value on his assets, which are meager.

Mr. Livermore once described himself as a "bucket shop graduate." Born in Massachusetts in 1877, he went to work in a Boston broker's office at the age of sixteen, marking quotations on a bulletin board and receiving \$6 a week.

With \$30 saved out of his salary Livermore embarked on the stormy seas of speculation. He took his first plunge in one of the "bucket shops" in the Hub—and came out on top. Flushed with this success and with confidence in his luck, he abandoned his job and started trading for himself. Before he was twenty-one years old he had made a comfortable fortune.

In 1906 he went to New York, having tried Boston, Denver and Chicago and yearning for bigger game. When he started in New York his stake was \$25,000. Before long this had been stretched into \$250,000.

When the panic of 1907 came he had realized that over-speculation and over-extension would be followed by disastrous liquidation and put out a short line of Union Pacific, Reading, Copper and Smelters. When the crash came he was able to cover every contract and start on a trip to Europe. He bought a mansion, a yacht and a string of automobiles, and Wall street spoke of him as a "wise young man."

Big Gambles in Cotton. Then he became interested in cotton. On his return from Europe, after the situation here had cleared up, he found the cotton market oversold and everybody short. He sprang his big cotton coup and came out between \$2,000,000 and \$3,000,000 ahead. Wall street was now convinced that he was a "wise young man."

In 1908 he tried to corner cotton and was reported to have lost about \$3,000,000. After that he was not heard from again until 1913, when suit was brought against him by the liquidating partners of the Stock Exchange firm of Mitchell & Co. Then he dropped out of view until the petition was filed. Most of the claims, the petition states, are for money due on promissory notes given for transactions in the open market in 1913 and 1914.

At the time of his failure, in 1913, Livermore announced that he had invested \$400,000 in a sum which brought him an income of \$20,000 and could not be touched. No mention of this is made in the bankruptcy petition. He lives with his wife at Bretton Hall, Broadway and Eighty-third street, New York.

In the petition filed the principal claims are: Mitchell & Co., \$27,463; Murray Mitchell, \$16,000; Chapman & Seaman, \$7,297; H. F. Bachman & Co., \$9,740; Wagner, Dickerson & Co., \$6,982; and Duryea, Tappin & Co., \$6,355. The assets include 5,000 shares of West Tonnage Consolidated Mining company, fifteen shares preferred and seven common of Long Island Motor Parkway stock, one share of stock of the Duinwoodie country club, and a claim against C. A. Little for \$6,426.

RED JACKET CURE FOR RATS.

Sew on the Coats, Then Give Rodents Free Run.

Pointers on how to get rid of the ubiquitous rat, from sewing a red jacket on him to dipping him in tar, are contained in a bulletin just issued by the Massachusetts state board of agriculture and compiled by Edward H. Forbush, state ornithologist. The following advice as to how to conduct an exterminating warfare is contained in the bulletin:

"Use cats, terriers, particularly the fox terrier, and ferrets; sew a red jacket on a captive rat or paint him; then release him; place a collar and a bell on a live rat and release him; dip him in tar and liberate him; also place tar in rat holes, runs and burrows; sprinkle chloride of lime around rat habitats or use carbolic acid."

MANLESS OFFICE BUILDING.

Women of St. Louis to Erect Structure For Fair Sex Only.

A woman's office building, from which men will be barred as tenants and where there will be women elevator conductors and women office messengers, is to be built in the downtown district by the women's council of St. Louis, composed of fifty-four organizations and clubs.

The council will issue stock. It is planned to begin work on the project in the near future.

The architect will be a woman, and women will handle all of the business dealings in regard to the building.

WILL CHECK RAVAGES OF LOCKJAW IN WAR.

Pasteur Institute Would Provide Serum For Every Wounded Soldier.

Professor Gabriel Petit, a bacteriologist, gives some details of the methods employed by the Pasteur institute to supply the enormous number of doses of anti-lockjaw serum required by the French army medical service for injection into wounded soldiers. The ideal of the institute would be to have on hand in the field a dose for every man wounded so that injections could be made in all cases, thus preventing lockjaw absolutely.

The stock of serum at the opening of the war was soon exhausted, and to keep up with the extraordinary demand the institute greatly increased its stable of horses used for "generating" the serum and reduced the period of preparation from five months to two. Each horse used in the work should furnish twelve liters of blood per active week, out of which three liters of serum can be extracted, making 300 doses of ten cubic centimeters each per horse per week. But the horse rests eight days after one week's yielding of serum.

In November the yield of the institute in serum was 150,000 doses, made from 1,000 liters of horse blood. The number of horses kept for this purpose in vast stables of the army veterinary school at Toulouse and in special establishments at Paris and at Garches is very large, because, in addition to anti-lockjaw serum, there are thousands of doses of anti-diphtheria and anti-dysentery serums to be turned out each week.

The serum breeding horse is inoculated first with very light doses of lockjaw toxin by intravenous injection. The doses of poison are slowly increased. A dose of a few drops given to a fresh horse would kill the animal very shortly, but slowly accustomed to the poison the horse can endure at the end of a few months of slow preparation doses of 300 cubic centimeters of pure toxin, or enough to kill between 2,000 and 3,000 healthy horses unused to serum breeding.

Because the serum is not a cure, but merely a prevention, it is of the utmost importance that every field surgeon and nurse should have on his person enough doses to treat all the wounded men he finds each day. The various medical means of treating the actual infection, once developed, are far from generally successful. Hence the keeping down of the rate of death from lockjaw depends directly on the capacity of the Pasteur institute to breed serum and on the competence of the medical service of the army in distributing the doses promptly to the surgeons and nurses in the field.

DOGS LEAD TO BURGLAR.

Fifty Pawn Tickets For Plunder Found In House at End of Trail.

After hunting for two days Sheriff Robert N. Heath and the police of Englewood, N. J., and two police dogs found the haunt of the men supposed to have committed recent robberies at Hawthorn. The dogs led through the woods of Dumont and Hawthorn to the home of Joe Blake, who jumped from a second story window and was caught by Policeman O'Neil.

In the house the sheriff found fifty pawn tickets for silverware, rings, gold watches and other valuables.

The sheriff was assisted by John Simons, a Greek, arrested last Sunday for a burglary in Tenafly. Blake insisted that Simons was the burglar and that he only received the stolen goods.

Seven homes were robbed about two weeks ago, valuables to the amount of \$500 being taken from one at Rudes hill.

CHAMPION RABBIT HUNTER.

Man of Seventy-eight Shoots Cottontails From His Buggy.

Stephen Osborne, seventy-eight years old, living five miles southwest of Gentry, Mo., claims to be the champion rabbit hunter of his age, at least in northwest Missouri.

He has killed 500 rabbits this winter and is not through yet. Osborne does his hunting in a buggy drawn by a twenty-one-year-old horse.

He is also accompanied by two dogs. The dogs scare the rabbits from their hiding places and bring the dead animals to the hunter, who does not leave his buggy.

Osborne says his best day's work was forty-nine rabbits out of fifty shots.

CENTENNIAL

Hanover Borough is 100 Years Old March 4.

Hanover borough will be 100 years old on Thursday, March 4, but there will be no general celebration of the event on that day. At least none has been arranged for up to the present time.

It is proposed to celebrate the centenary with an "Old Home Week," next fall. A movement for this was started last summer, but did not take definite shape. The idea has again been suggested and it is possible that it will be taken up by the civic bodies of the borough.

TO REVISE METHODS OF AMENDING CONSTITUTION.

Entirely New Plan of Revision Proposed by Commission.

A movement has been launched by the committee on the federal constitution for a revision of methods of amending the constitution of the United States that will make it easier to secure needed amendments in the future. A resolution embodying the committee's plan was recently introduced in congress by Representative Bryan of Washington. A two-thirds vote in both houses of congress and ratification by three-fourths of the state legislatures will be necessary to the adoption of this resolution.

The changes provided for in the resolution would reduce the vote by which congress proposes amendments to the constitution from two-thirds to a simple majority and of the number of the state legislatures required for the ratification of amendments from three-fourths to two-thirds. In addition to this an entirely new plan of revising the constitution is proposed.

This new plan calls for the submission to the voters every twenty years of the question whether a convention shall be called to propose amendments to the constitution, and when decided in the affirmative delegates are chosen and the convention assembled on the 4th of March two years afterward, while amendments proposed by the convention are voted on at the ensuing presidential election. A two-thirds vote being required for ratification. This plan is almost identical with the convention system of amending state constitutions as followed in New York and other states.

The committee believes that the present method of amending the constitution is outworn and unworkable and that if the constitution is in the future to be adapted to changing social and political needs a more liberal method of amendment must be adopted. It is claimed in behalf of the plan that it requires full deliberation, does not encroach on the rights of the states and affords adequate protection to the minority. The proposed convention system would not make the calling of conventions compulsory, but only optional, and this, it is believed, will insure against interference with the constitution except when there is a general demand. The committee contends that under the present system the people have but little voice in matters affecting the constitution and that this plan is put forth to give them power. Self government in any real sense is, in the committee's opinion, impossible without it.

The committee includes in its membership Professor Charles A. Beard of Columbia university, W. T. Cross, secretary of the national conference of charities and correction; H. S. Gilbertson, executive secretary of the national short ballot organization; Professor Albert Bushnell Hart of Harvard university, Miss Florence Kelley, general secretary of the National Consumers' league; Owen R. Lovejoy, general secretary of the national child labor committee; Rev. Charles S. Macfarland, secretary of the federal council of the churches of Christ; Charles A. Prosser, secretary of the National Society for the Promotion of Industrial Education; Professor Edward A. Ross of the University of Wisconsin; Rev. Charles Stelzel, founder of the Labor temple, and Clinton Rogers Woodruff, of the National Municipal league.

These Are Advantages No Other Range Offers.

A complete and perfectly operating coal range and a complete and labor saving gas range, combined in one. Saves buying two ranges to secure the advantages of both coal and gas fuel. Provides a range that burns gas when the weather is warm and sultry, and that burns coal when the weather is cold and wintry. A range that is a money saver, because it admits the use of the cheapest fuel for doing any class of work. A range that is ready for any emergency. For quick action, use gas—for slow, or continued work, use coal. A range that affords a place to burn trash, sweepings or waste paper in summer when gas fuel is used—a great convenience.

We have a full stock of Ranges with or without reservoir. Call and see our line before buying this Spring.

Cheap Witticisms.

It were well if the so-called "clever story writer," who, too often, is the chief nuisance of the manuscript editor of all magazines, could be brought to a realization that mere exaggerations and disgusting incidents are not "fun;" would save postage and lessen the certainty of rejections.—"Cheap Wit vs. the Dairy Lunch," George Willoughby, in National Magazine.

Corner on Calendars.

Among the Greeks and Romans almanacs or calendars were not written for the general public, but were preserved as part of the esoteric learning of the priests, whom the people had to consult, not only for the dates of the festivals but for the proper times when various legal proceedings might be instituted. History does not relate how the society women of ancient times managed to get through a season without an engagement calendar.

SHIPS SUNK IN BLOCKADE WAR

Two More British Vessels
Sent to the Bottom.

FOURTH OFF SAME SPOT

All But One of Crew Is Saved When
Explosion Splits Vessel in North
Sea.

London, Feb. 26.—The fourth British ship to be torpedoed off Beachy Head, in the English channel, within three days, the coasting steamer Western Coast, went down.

It is believed that the steamer was the victim of a German submarine. The crew was saved and has been landed at Portsmouth.

That four British vessels have been torpedoed in three successive days off Beachy Head and Eastbourne, which is only three miles away, in Sussex, indicates plainly that a German submarine is confining all its activities to that part of the English channel which touches the middle Sussex coast.

The collier Bransome China, the Harpellon, the Rio Parana and the Western Coast in succession have all gone down in that locality.

Beachy Head is a headland in Sussex, projecting into the English channel, three miles southwest of Eastbourne. It consists of chalk cliffs, rising perpendicularly to 565 feet above the sea, and has a lighthouse.

One sailor lost his life when the Deptford, of 1208 tons, was sent to the bottom in the North sea. The fifteen other members of the steamer's crew were saved and were landed at South Shields.

After leaving the torpedoed ship and spending hours in an open boat in a snowstorm, the men say they signalled a steamer, but no notice was taken of their appeal. Later they encountered the steamer Fulgens, which picked them up. Some members of the crew say they saw the wake of a submarine after the Deptford was struck.

U. S. Raises Rates on Insurance.

Washington, Feb. 26.—All ports in the British Isles were made "special ports," requiring special rates of war risk insurance from the government bureau, by an order issued by Secretary of the Treasury McAdoo.

The only special ports in the United Kingdom under former orders were those on the North sea, north of London.

The order also extends the special port zone on the Continent to include Bordeaux. The previous limit was Dunkirk. The bureau reserves the right to refuse insurance to these ports.

CONFESSES MURDER IN 1911

Youth in Prison Sought by Berks County Officials.

Richmond, Va., Feb. 26.—Alleging that they obtained a confession in the Virginia penitentiary from Joe Cary, alias Joe Winsey, to the effect that he fired the shot which killed Gordon Kaufman, a Reading, Pa., baker, when he and three other youthful companions entered Kaufman's place in the fall of 1911 and quarreled with him over a few cents.

Harvey F. Heiney, district attorney of Berks county, and Harry D. Schaefer, former district attorney, called at Governor Stuart's office, seeking requisition for the youths. They are now serving twelve years each in the penitentiary for highway robbery committed soon after the Reading deed.

Governor Stuart, being ill at the executive mansion, the lawyers said they would return home and write him about the matter.

CLEARING NEW CAMP SITE

100 Acres to Be Added to N. G. P. Grounds at Mount Gretna.

Mount Gretna, Pa., Feb. 26.—Lieutenant Colonel L. V. Rausch, state arsenal keeper, N. G. P., of Harrisburg, started a crew of twenty-five men at work clearing up 100 acres of land, to be prepared for the encampment grounds of a brigade.

The new brigade grounds when ready will allow the encampment of 2700 men. This is the Fourth brigade site and improves conditions at Mount Gretna for encampment purposes, so that 10,000 soldiers can pitch camp without the slightest inconvenience.

The land being cleared is south of the icehouse railway branch running from Colebrook.

Want Troops to Take Plumes.

Salt Lake City, Feb. 26.—A special to the Desert News from Bluff, Utah, says Indian Agent Creel and Assistant District Attorney Cook are in conference with Marshal Nebeker, Agent Jenkins and citizens of Bluff regarding the best method to apprehend the hostile Plutes.

New York Alien Law Upheld.

Albany, N. Y., Feb. 26.—The constitutionality of the state law prohibiting the employment of aliens on public work was upheld by the court of appeals. Suit was brought in connection with the employment of laborers in the New York subway.

BAR TO SUFFRAGE

Fear 10,000 Colored Women Would
Be Balance of Power in Delaware.

Dover, Del., Feb. 26.—Observers of the bloodless battle for the ballot by suffragists in Delaware are convinced that it has degenerated into a partisan clash, and that with few exceptions the Democrats will oppose enfranchisement, while the Republicans will support the amendment.

Unwillingness to give the ballot to approximately 10,000 colored women in the state is believed to be the stumbling block in the path of suffrage. The colored vote is the problem of the Delaware politician.

There are approximately 15,000 voters in the state, the population of which in round numbers is 202,000. White women who would be enfranchised are said to number about 35,000.

How Indians Purified Water.

The Indians had a way of purifying water from a pond or swamp by digging a hole about a foot across and down about six inches below the water level a few feet from the pond. After it was filled with water they bailed it out quickly, repeating the bailing process about three times. After the third bailing the hole would be filled with filtered water. Try it.—Boy Scout Handbook.

Why Corn Has Silk.

A Potato Hill man who is sixty-one years old never knew until recently that for every grain on an ear of corn there is a silk running out to the end of light and moisture. These silks run back under the husk. One is attached to each grain on the cob and nourishes it. Everything in nature is more wonderful than any invention story.—Potato Hill Cor. in Atchison Globe.

Culture's Progress.

"Our daughter is studying French, German, music, dancing and painting," said the fond mother complacently. "Well," replied Mr. Camrox, "that's a good start. But has she yet learned not to use back number slang and chew gum?"—Washington Star.

Be Pretty! Turn Gray Hair Dark

Try Grandmother's Old Favorite
Recipe of Sage Tea and
Sulphur.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray; also ends dandruff, itching scalp and stops falling hair. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Hair Remedy," you will get a large bottle of this famous old recipe for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application of two, your hair becomes beautifully dark, thick and glossy.

PUT SULPHUR ON AN ITCHING SKIN AND END ECZEMA

Says this old-time Eczema remedy
is applied like
cold cream.

Any irritation or breaking out on the face, arms, legs or body when accompanied by itching, or when the skin is dry and feverish, can be readily overcome by applying a little bold-sulphur, says a noted dermatologist.

He states that bold-sulphur instantly allays the angry itching and irritation and soothes and heals the Eczema right up leaving the skin clear and smooth. Bold-sulphur has occupied a secure position for many years in the treatment of cutaneous disorders because of its parasite-destroying property. Nothing has ever been found to take its place in treating the irritable and inflammatory skin affections. While not always establishing a permanent cure it never fails to subdue the itching irritation and drive the Eczema away and it is often years later before any eruption again appears on the skin.

Those troubled should obtain at any drug store an ounce of bold-sulphur, which is applied to the affected parts in the same manner as an ordinary cold cream.

An Ingenious Courtship

By WILLARD BLAKEMAN

Mrs. Martindale, realizing the dangers which beset young persons who step into matrimonial traps, desired that her daughter should be settled matrimonially while her mother lived and that she should marry a good man. Edward Sawyer was the person on whom Mrs. Martindale had fixed her intentions for her daughter. One day she said to him:

"Edward, I have noticed that you seem pleased with Gwen. I wish to see her settled before I leave her. If you wish to marry her I will help you to win her. If not, I shall try to make a match for her elsewhere."

"You have not been deceived in my partiality for Gwen, Mrs. Martindale, but I don't see that Gwen has any special partiality for me."

"Gwen is romantic and needs to be won by romance. That is why I fear for her. Some worthless fellow is liable to appeal to her in that way and marry her. I value that which is practical in you and wish that you might sink it temporarily, be a bit sentimental, catch Gwen and marry her. After marriage I am sure your good sense and wisdom will hold her."

Mr. Sawyer sat evidently turning something over in his mind, then assured Mrs. Martindale that, although he would be glad to win her daughter, he feared that he was too matter of fact to please her.

One day Gwen received a note which put her in a flutter. The writer declared that he had known her for some time; that he had loved her from the moment he first saw her; that he had forborne to give her the slightest hint of his affection because he had not observed any predisposition on her part for him. He was a believer in love from the beginning. He knew the woman he wanted the moment he met her and felt sure that if she wanted him she would know him. While he would not make himself known, he could not refrain from telling her that he loved her.

In a few weeks came a second letter. In it her correspondent said that he was impelled to write to her, though he had no information of himself to communicate. He had met her once since he had written the first letter, but had observed nothing in her greeting to give him any reason to think that she had chosen him as he had chosen her. Nevertheless he had a faint hope that there might be some subtle medium of transference which would enable his love to kindle its like in her.

Whether or not this medium existed, Gwen's heart went out to this unknown lover, or, rather, to a being whom she created. She was troubled that he did not enable her to make even a written reply by giving her an address. But one day she received a letter in which he said that he was ill and was pining for a word from her. If he did not get it he feared for the result. An address was given, but she was assured that she would not be able, even if she desired, to trace him.

Gwen did not find the difficulty to be expected in writing a reply, because she wrote to one created by her own fancy. She did not intend to write a loving letter to an unknown man. She thought she merely expressed sympathy. But sympathy is so nearly akin to love that the expression of the one will often do for the other.

The stranger having given an address where a letter might reach him, quite a brisk correspondence sprang up between him and Gwen. She suggested that he make himself known, that if they could not be lovers they might at least be friends, and she longed to do something to show her appreciation of his preference for her. To this he replied that he was sure that when she knew which of her acquaintances he was, that he was a plain, ordinary man, she could not refrain from showing her disappointment. Nor would she believe that one she had known could have so long concealed the love buried away down in his breast.

To this she replied that such a discovery could not but interest her and might turn the scale in his favor. After much urging and the expression of many misgivings he consented to make himself known. He agreed to call upon her on a certain evening. When that evening arrived she spent much time before her glass arranging her costume, and when she heard the ring of the doorbell her heart leaped into her throat. She went downstairs, trembling with anticipation.

"Why, Ned Sawyer?"

Sawyer shrank back as though fearing she was about to cast a blight upon him. "Can it be," Gwen added, a slight color rising in her cheeks, "that you have so long lived near me, have seen me so often and yet have been able to conceal what you have expressed in those lovely letters?"

"Oh, Gwen, tell me, are you—do you wish I had turned out to be some one else?"

"Why, Ned, do you mean to tell me that you haven't known that I—"

He clasped her to his breast. "No; had I even suspected it I would not have wasted so much time on this confusion!"

He checked himself in time to prevent spilling what he had accomplished.

A REMEDY FOR BRONCHIAL COLDS

Philadelphia Man Tells How He Treated a Severe Case With Vinol and the Successful Result.

Philadelphia, Pa.—"Last Fall I was troubled with a very severe bronchial cold with very bad effects from it, headaches, backaches, and sick to my stomach. I was so bad I became alarmed and tried several medicines, also a doctor, but did not get any relief. One of the men where I am employed asked me to try Vinol, saying it cured his worst cold. I did so, and in a very short time received the relief which I craved. Now I am enjoying perfect health, and recommend Vinol to be all that is claimed for it."

—JACK C. SINGLETON, Philadelphia, Pa.
When we tell you that Vinol is the best remedy in all our large stock for chronic colds, coughs and bronchitis there is no excuse for letting a cough or cold hang on for months and even years.

It is the curative medicinal elements of the cod's livers, combined with blood making and strengthening properties of tonic iron contained in Vinol which makes it so successful in removing chronic coughs, colds and bronchitis, after other medicines fail.

Try a bottle of Vinol with the understanding your money will be returned if it fails to help you. People's Drug Store, Gettysburg, Pa., and at leading drug stores everywhere.

Discuss the Full Crew Laws with Your Elected Representatives

The twenty-one railroads of Pennsylvania and New Jersey earnestly request that the people of those States have a heart-to-heart talk with their elected representatives at Harrisburg and Trenton, regarding the existing Full Crew Laws.

In making this request, the railroads ask only that the people—after giving the subject serious thought and due consideration—give their views to their district representatives and ask them where they stand on the matter.

The railroads merely request the people to discuss the subject sanely, dispassionately, without fear, favor, bias, or prejudice. They have already submitted the case to the court of public opinion. Whether the Full Crew Laws shall continue in force or be repealed is a question that the people can decide.

SAMUEL REA, President, Pennsylvania Railroad. DANIEL WILLARD, President, Baltimore and Ohio Railroad.

THEODORE VOORHEES, President, Philadelphia and Reading Railway.
